Subject: Additional EM survey and test pitting

Dear Joyce and Curt,

I wanted to let you know in advance that we plan to include the additional EM survey and test pitting work at the Neuhauser Landfill site in the drum removal work plan.

The survey is currently scheduled for November 29, the earliest date that National GPR is available. Ideally, work on the drum removal will also have started by that date.

We hope you both can observe the EM survey real time and help decide on test pit locations.

Let me know if you have any questions or concerns, otherwise we look forward to your comments on the work plan, which we anticipate submitting by the 15th.

Best regards, Dave
